Scoring Method: Excellent scores receive two points each. N/A's also receive two points. Satisfactory scores receive one point each. Unsatisfactory scores do not receive points. Total each column. To determine the evaluation score, multiply all Excellent and N/A scores by two, and then add the number of Satisfactory scores. The resulting figure is the combined overall cattery score. The best possible score is 88 points. A score of 75 or higher is deemed EXCELLENT and will receive an "Outstanding Cattery" certificate, a score of 58-74 points is deemed PASSING and will receive a "Cattery of Merit" certificate. All scores before 58 points are deemed FAILING. Breeders should rectify their problem areas and may reapply for evaluation.

Any unsatisfactory answer under the Requirements section is an automatic disqualification for the cattery.
